

Morphology-L4

PKD

We have observed thru our useful discussion in the classes that there are different kinds of WORDS i.e. simple, compound and complex. For example

Syntactic Compounds are formed with the help of a Verbal affix e.g. **-ing, -er, -ed** or is a **past participle** such as *breath taking, watch maker, long-tailed and man made*.

Root compounds are the other class of compounds made of **two nouns, two adjective, a noun and an adjective** or a **preposition** and a **verb**.
